

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

NOTES

I have been reading the article on the SIGMA XI QUARTERLY by Professor G. A. Miller which is published in the December number, and it leads me to write to express my view that the SIGMA XI QUARTERLY has filled a desirable place in keeping the older men in some touch with the organization. For my own individual part, I will say that I welcome the QUARTERLY, and always look it over for the purpose of seeing what is going on in the Society, and conceive that it is necessary for the members to keep in touch in some way if the Society is to serve its best ends. If this is to be accomplished, some publication does seem to be necessary.

D. C. J.

Dear President Stieglitz:

I am fully aware that there is no need for any comment from me regarding the Sigma Xi Convention in Pittsburgh, but I cannot refrain from expressing to you my great satisfaction at the way in which both the afternoon and evening sessions were conducted. I feel especially grateful to you for the change made at the dinner in substituting for the usual chapter reports the informal speeches by well-known scientific workers. I may be allowed to say that I hope you will follow this plan at the next dinner, and that all future presidents will adopt your procedure. I am sure that everyone feels that a marked advance has been made and is grateful to you for what you have done for the Society.

Cordially yours,

E. E.
